Doc M 1:11:2
The DDA and Doc M explained

The revised disability discrimination act of October 2004 requires: ‘That all suppliers of services, goods and facilities to the general public must remove all physical barriers where deemed reasonable’. Some of the key requirements for Doc M are explained below. For full information please refer to Armitage Shanks Doc M Solutions brochure or Doc M of the Building regulations.

So if you are offering or required to offer toilet facilities to your customers, clients or employees, you must make reasonable provision for everyone of all levels of ability including wheelchair users. Failure to do could result in litigation.

Washrooms
Where you have a washroom with more than one toilet you will need a standard unisex Doc M pack by the main washroom.

Washrooms Cubicles
Washrooms must offer different types of cubicle.
- Standard Cubicles
- At least one ambulant cubicles per washroom
- For every four cubicles (including ambulant) you must have an enlarged cubicle.

Public Shower Facilities
If you are offering showering facilities at least one should be wheelchair accessible.

Special Requirements
- All taps must be thermostatically protected with the hot water discharging at a maximum temperature of 41 degrees C
- Sanitaryware, wall and floors must all contrast with each other. The standard stipulates a contrast value of 30 point difference in the Light reflectance value (LRV) between the surface finish of the sanitaryware, taps and grab rails with the background walls and floor.

The Colour RAL and LRV values are laid out below.
